

## WDP ENERGY: DRIVING THE GREEN TRANSITION

As the need for reliable, affordable energy grows, WDP is taking a visionary approach to help our clients meet their efficiency targets. Since warehouses are a key link in every supply chain, we want to maximise their contribution to a fully sustainable logistics industry. From rooftop solar parks to on-site EV charging facilities, we are fully committed to the transition to green energy and to offering our clients new and affordable ways to benefit from it.

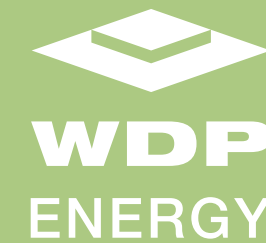

We select the most appropriate, high-quality technologies and materials and take care of the on-site infrastructure, installation and follow-up so you don't need to worry about a thing. It's all part of the WDP service!

### READY FOR THE FUTURE

We offer EV systems that will service your business reliably in the long term. From the start, we make sure that the infrastructure is suitable for your needs. We can also offer smart load balancing to support the grid capacity and can integrate the charging infrastructure with other sustainable energy systems, such as solar energy.

As the energy market and mobility sector evolve, we are focused on keeping you up to speed with robust, agile and forward-thinking solutions.

### ABOUT WDP

WDP is your partner for the development and lease of logistics real estate. Our **'Warehouses with Brains'** are the beating heart of intelligent supply chains that give you the flexibility to address every economic need. Their efficient, tailored and sustainable design boosts your operational success and enables you to reach peak performance in storage, production and distribution. Since 2022, our real estate offering has been supplemented by **'Services with Brains'**, a unique portfolio of dedicated services that make us the ultimate warehouse partner.

As the need for reliable, affordable energy accelerates, **'Energy as a Service'** is designed to offer you significant value with smart innovations and creative thinking to support your business. We are growing this services to provide a comprehensive WDP Energy offering including EV charging stations, heat pumps and (in the near future) energy storage solutions, ...

## EV Charging Stations

Energy at your service

# EV CHARGING STATIONS

## A 'SERVICE WITH BRAINS'

As battery ranges increase, charging infrastructure improve and electric vehicle prices become more affordable, electric mobility is becoming a new standard. There has never been a better time to switch to electric cars and trucks for your business and impress your customers and visitors with quick, reliable charging facilities. Our full-service charging stations service supports your entire journey so you can optimise and future-proof your facility with minimum fuss and maximum efficiency.

### WHY CHOOSE WDP?

We have a shared interest – your warehouse! We take pride in maintaining and future-proofing our facilities so that they continuously meet the highest standards. And, as we know your warehouse inside out, we are perfectly positioned to install the right equipment and infrastructure for your needs.

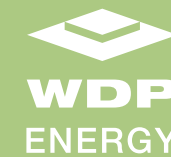

#### YOUR BENEFITS

- We handle everything, from design and engineering to operation and maintenance.
- We take on the full financial investment.
- We use only the highest-quality technologies and products.
- You have a real time overview of charging status and behaviours.
- Your facility is future-ready with a smart load balancing system allowing higher stability of the grid as well as optimal integration with other sustainable energy systems on site.

### AN END-TO-END SOLUTION FOR WDP CLIENTS

Partnering with WDP is a straightforward, cost-effective way to start or accelerate your EV journey. We take care of the financial investment and cover the operating costs in case of lower adoption rate than foreseen, limiting the risk for you. From your first request, we deal with every aspect of the project, defining engineering needs, selecting the right equipment, presenting you with a transparent price proposal and securing your agreement before processing the order. After installation, we remain at your service 24/7 through our reliable Charging Point Operator (CPO) partner. Invoicing, payment and charging card management are straightforward through CPO software installed in the chargers, with no additional burden for you.

Package solutions through **single point-of-contact**

Customer support with **EV consultancy and market developments**

**24/7 helpdesk** through our reliable CPO partner

### TAILORED FOR YOUR BUSINESS NEEDS

Every WDP charging station solution is customised for the individual client, based on analysis of their fleet, business needs, current situation and long-term plans. To design your package, WDP will take into account the evolution of your fleet (cars and/or trucks), layout of your facility, electricity available on your site and the required capacity. Whether you want to provide a public charging service or prefer to keep it private, the choice is yours.

#### WHAT'S IN THE PACKAGE?

Our solution includes everything you need for reliable and efficient electric mobility.

- Engineering
- Infrastructure investment
- Groundworks and cable works
- Installation and connection
- Preventive and corrective maintenance
- Real time monitoring of charging behaviour
- Insurance
- 24/7 helpdesk and interventions within 24h
- Transparent, fixed kWh unit price
